INDEX TO VOLUME XXXIII.

[Owing to the General Strike, two normal issues missed publication]

SUBJECT INDEX.

A

Accidents, Human Factor in the Causation of, 218
Aluminium-Alloy Permanent-Mould Castings, 93, 105, 125, 173, 237, 255
Aluminium Alloys from the Users' Point of View, Commercial, 3, 34
Aluminium Alloys: Review of Current Methods, Die-Casting of, 187, 207, 233
Aluminium-Copper Tin Alloys, Copper Rich, 278
Aluminium Foundry Practice, 279, 293, 307, 329, 355
Aluminium Paint Extending, Use of, 54
Aluminium Pistons Growing in Favour, 75
American Cast Pipe Makers Merge Interests, 386
American Foundry Conditions, 360
Annealing Brass, Notes on, 341

B

B.C.I.R.A., Falkirk Meeting, 246
Birmingham University Chair of Metallurgy Change, 316
Birtley Iron Company, Foundrymen Visit, 11
Blast-Furnace Burden, Scrap in the, 27
Blowing Machines, Few Notes on, 281
Bosshardt Open-Hearth Furnace in Foundry Practice, 185
Brass and Bronze, Melting and Pouring of, 76
Brass, Notes on Annealing, 341
Bricks, Fireclay, 339
Bushel, Making of the Old Standard, 192

C

Caisson Hauling Machinery, for King George's Dock, Calcutta, 150
Carbon in Cast Iron, Influence of Prolonged Heating on the Formation of Combined, 411
Castings, Aluminium-Alloy Permanent-Mould, 93, 105, 125, 173, 237, 255
Castings by the Sand-Slinger, Production of Small, 175
Castings, Copper, 12
Castings Design, 65, 262
Castings, Notes on the Production of, 226
Castings, Production of Light Grey-Iron, 53
Cast Iron for Electrical Machinery, 459
Cast Iron in the Electric Furnace, Production of High-Grade, 111
Cast Iron, Recent Developments in, 286
Cast Iron, Results Obtained in the Improvement of the Qualities of, 496
Cast Irons, Special, 194
Centrifugal Casting as Applied to the Manufacture of "Spun" Iron Pipes, Principles of, 23, 43, 63
Chemistry of the Cupola, Some Notes on the, 491
Chill Roll Mould, Making a, 268
Coke Research, Blast Furnace, 180
Cold-Rolled Copper, Hardness of, 281
Combines in Germany, Specialisation, 499
Comparisons in Foundry Methods and Processes, 276
Condenser Core, Making a Large, 56
Copper Castings, 12
Copper, Manufacture of, 274
Cores and Production, Oil-Sand, 69

Correspondence:—

Birth of the Electric Furnace Industry, 48, 62, 114
Britain's Largest Ironfoundry, 327
Cupola Design, 272
Cupola Furnace, 200, 206, 272, 300, 315, 375, 386
Electric Furnace Practice, 300, 320, 327
Foundry Costing, 62
Hot Spots, 326
Influence of Special Elements on Grey Cast Iron, 2
Liquid Shrinkage, 124
Moulders' Brads, 124, 200
Provisional Protection for Inventions, 327
Refractories in the Foundry, 410
Selling of Castings at Trade Exhibitions, 157
"Shell" Defect in Ingot Moulds, 144
Standardising Foundry Equipment, 169
Corrosion-Resisting Finishes, Some, 261
Costing, Foundry, 215, 232
Costing, Iron-Foundry, 430
Craftsman, Training and General Position of the, 28
Crystal Growth in Recrystallised Cold-Worked Metals, 213
Cupola Furnace, 170, 199
Cupola, Some Notes on the Chemistry of the, 491
Cupola Spark Arrester, Novel, 52
Current Distribution and Price Problem, 156
Cylinder Pig-Iron to Fracture and Analysis, Some Notes on the Production of, 457

D

Design, Casting, 65
Desulphurisation Experiments on Cast Iron, 379
Detinning Tinplate Scrap, 495
Detroit Congress, 50, 306
Die-Casting of Aluminium Alloys: Review of Current Methods, 187, 207, 233
Drawing Office and Pattern Shop, 464
Drum in Halves, Making of a 5-ft. Surging, 117
Drying Stoves, Efficient Battery of, 214

E

Electric Furnace, Production of High-grade Cast Iron in the, 111
Electric Steel Castings and Notes on Defects, Discussion on Mr. Melmouth's Paper on "Some Metallurgical Points on," 13
Electric-Steel Furnaces in the Steel Foundry, Influence of Working Methods and Cost of Current on the Economy of, 109
Eyes and Foundry Processes, 110

F

Fettling, Sand Blasting and Other Aids to, 145
Fireclay Bricks, 339
Fly Wheel, Making a 60-Ton, 49
Foremen: Good and Bad, 138
Foundry Costing, 215, 232
Foundry Costing, French Conception of, 358
Foundry, Day in the, 133
Foundry Delivery and Output, 235
Foundry Economics, 74
Exhibition, Foundry, 366
Furnace in Foundry Practice, Bosshardt Open-Hearth, 185
Foundry Management, Organisation and Costing, 380
Foundry Materials under the Microscope, 177
Foundry Methods and Processes, Comparisons in, 227
Foundry of Henry Ford & Sons, Ltd., 6
Foundry Practice, Standardisation in Modern, 129
Foundry Problems, Recurring, 165

Foundry Queries:—

Cracks in Steel Ingots, 348
Gear Wheels, 124, 178
Liquid Iron Cement, 2
Removing Gates from Malleable Castings, 118
Rustless Cast-Iron Castings, 286
Foundry, Some Factors which Constitute Porblems in the Iron, 42
Foundry Trades' Equipment and Supplies' Association, Ltd., 193
Foundry Work, Commercial Side of, 74
Foundry Work from the Metallurgical Standpoint, 78
French Conception of Foundry Costing, 358, 376
French Foundrymen's Association, 366
Furnace, Cupola, 170, 199
Furnace in the Iron and Steel Foundry, American Electric-Heating, 113
Furnaces, Service Conditions of Refractories for Open-Hearth Steel, 468

G

Gases Evolved from Heated Iron, 219
Gases in Metals, 386
Gases in Metals, New Method for Determining, 56
German Foundrymen's Association, 111
Goggles, Protective Furnace, 119
Grey Cast Iron, Suggestion for the Preparation of High Quality, 206
Grey Iron, Liquid Shrinkage in, 85

INDEX TO VOLUME XXXIII.

L

Leaders:—

American Foundry Conditions, 347
British Cast Iron and Steel Castings Research Association? 61
Conference, 439
Detroit Conference, 225
Educational Value of Foundry Conventions, 325
Exhibition, 405
Extending Technical Knowledge, 143
Foundry Conditions and the Committee on Industry and Trade, 21
Fuel Economy, 285
Hot Spots, 163
International Foundry Trades' Exhibition, 267
Introspective, 1926, 1
London Congress, 245
Mass Effect and Cast Iron, 41
No Material Change, 365
Non-Ferrous Metals Research Association, 305
Pig-Iron Market, 103
Permanent Mould Aluminium Alloy Casting, 83
Pre-Exhibition Notions, 385
Quantity Production in Europe, 473
Standardising Foundry Equipment, 123
Tin Position, 183
To Scrap or Not to Scrap, 205
Lifting and Shifting Appliances in Foundries, 247
Light Castings Industry, 27
Light Grey-Iron Castings, Production of, 53
Liquid Shrinkage in Grey Iron, 85, 154
London Convention, 164, 286, 357, 367
Low-Pressure Blowers for Cupolas, 273

M

Machine Plate Moulding Practice, 336
Macrostructure of Cast Metals, Interpretation of the, 213
Magnetic Separator for Feebly-Magnetic Minerals, New, 392
Magnetically Reclaiming Metals, 409
Melting Practice in the Iron Foundry, with Special Reference to the Shaft Furnace, 399
"Merco" Valve, 186
Metallurgical Student in Industry, 257, 278
Moulding a Medium-Sized Strainer, 174
Moulding a Still in Loam, 337
Moulding of Grooved Pulleys, 367, 393
Moulding Sands, 118
Moulding Sands, Practical Utilisation of Apparatus for Measuring the Permeability and Cohesion of, 449

N

Nickel and Copper, with Special Reference to Creep, Mechanical Properties of an Alloy of, 292
Nickel Chrome Alloys, Heat-Resisting, 411
Non-Ferrous Foundry, Glimpse into a, 296
Non-Ferrous Metallography, 453, 486

O

Oil-Sand Cores and Production, 69
Oil-Sand Cores Extending, Use of, 184
Open-Hearth Process, Re-melting Pig-Iron in the, 500
Oxy-Acetylene Cutting, Effect of Oxygen Purity on, 348

P

Patching Patterns, 259
Pattern-Making and Its Relation to Design and Foundry Practice, 349, 400
Pattern-Shop Aids to Foundry Production, 311
Pearlitic Cast Iron, Some Further Notes on, 95, 333
Perlit Iron, 115, 195
Permanent Moulds, 156
Pistons, Growing in Favour, Aluminium, 75
Power and Heat Problems in the Foundry, 269, 287
Puddling Industry, Birth of the, 99
Pulleys, Moulding of Grooved, 367, 393

Q

Quality in Quantities, 481

R

Refractories for Open-Hearth Steel Furnaces, Service Conditions, 468
Refractories in the Foundry, 387, 445
Refractories, Progress in Plastic, 184
Refrigeration in Engineering, 375
Research in Cast Iron, 84
Research to Modern Foundry Practice, Some Applications of, 31
Roofs, Suspended Open-Hearth, 55
Rolls from Semi-Steel, Making, 474
Rustless Iron, 328
Ryland's Directory, 1926, 98

S

Sand Blasting and Other Aids to Fettling, 145
Sand-Slinger, Production of Small Castings by the, 175
Selling of Castings, 16, 97, 108, 238
Shrinkage in Grey Iron, Liquid, 85
Silver and Tin, Constitution of the Alloys of, 232
Sir Robert A. Hadfield on Industrial Conditions, 373
Soft Soldering of Copper, Some Experiments on the, 240
Special Cast Irons, 194
"Spun" Iron Pipes, Principles of Centrifugal Casting as Applied to the Manufacture of, 23, 43, 63
Standardisation in Drawing Office and Pattern Shop, 401
Standardisation in Modern Foundry Practice, 129, 151
Standardising Pattern Equipment, 295
Standard Pattern Colours, 379
Statistics of Ironfounding, 466
Steel Manufacture, Direct, 448
"Sterling" Boxes, Making of, 406
Strainer, Moulding a Medium-Sized, 174
Strain-Hardened Metals and Its Relation to Creep, Note on the Softening of, 240
Striation Due to Working or to Corrosion in Microscopical Metallography, 320
Still in Loam, Moulding a, 337
Surtees Medallists, 348
Suspended Open-Hearth Roofs, 55

T

Testing Castings, Application of the New Methods of, 16
Testing Method for Cast Iron, Quick, 398
Tool Clubs, 372
Training and General Position of the Craftsman, 23, 51
Transverse Testing Machine, Home-Made, 109

V

Valve "Merco," 186

W

Welfare Work, Interesting Example of, 164
Which Shop to Blame? 92
Wood Joints, Note on, 64
Wrought-Iron Industry, 1925, 10

Z

Zinc Oxide in Brass, Determination of, 240
